

POPULAR REACT JS ANIMATION LIBRARIES

FRAMER MOTION

Framer Motion is a powerful and versatile animation library that is popular for its declarative API and its support for spring physics. It allows you to create complex animations with ease, and it includes a number of features that make it easy to animate components in your React applications.

REACT-SPRING

react-spring is another popular animation library for ReactJS. It is a lightweight library that is based on spring physics, and it is known for its performance and its ease of use. It is a good choice for developers who want to create simple animations without having to learn a complex API.

ANIME.JS

anime.js is a JavaScript animation library that is also popular for use with ReactJS. It is a powerful and versatile library that is known for its performance and its wide range of features. It is a good choice for developers who need to create complex animations with a lot of control.

GREENSOCK

GreenSock is a JavaScript animation library that is well-respected for its performance and its powerful features. It is a good choice for developers who need to create high-performance animations with a lot of control. However, it has a steeper learning curve than some of the other libraries on this list.

REACT-MOVE

react-move is a lightweight animation library for ReactJS that is based on CSS transitions. It is a good choice for developers who want to create simple animations without having to learn a complex API. However, it is not as powerful as some of the other libraries on this list.
